

# Employee Safety Services At No Cost

## On-Site Risk Assessments

- **Safe Patient Handling and Mobility (SPHM) Quality Initiative**  
Designed to improve the quality of patient care and reduce employee injuries. This program includes a comprehensive analysis and assessment of your current SPHM program, assistance with the development of protocols, policies, and KPIs to support the program. It also includes one-on-one consulting from our Patient Safety and Workers' Compensation experts.
- **Workplace Safety Assessments**  
Includes a walking tour of the facility to evaluate workplace safety practices of employees in their routine work environment. The related activities also assess fire safety, slip and fall hazards, lighting, exits and exit ways, workstations and electrical safety throughout the facility.
- **Security & Threat Assessment**  
Site-specific comprehensive assessment of the policies, procedures, systems and physical conditions as they relate to facility vulnerability to violence.
- **Slip, Trip and Fall Assessment**  
A comprehensive assessment of the exterior and interior of a facility specifically targeting slip, trip and fall hazards.
- **EVS Safe Lifting Assessment**  
A risk assessment specifically to evaluate lifting in the environmental services department.

## Workplace Training

We offer numerous topics for on-site employee training. These workplace training opportunities are developed to address specific workplace hazards or a unique organizational department.

- Slip, Trip and Fall Prevention
- Situational Awareness
- Workplace Violence Prevention
- Needlestick Prevention
- Harassment and Bullying
- Back Injury Prevention
- Dietary Safety
- EVS Safety
- GHS Labeling & SDS
- Home Health Safety & Security

## More Training

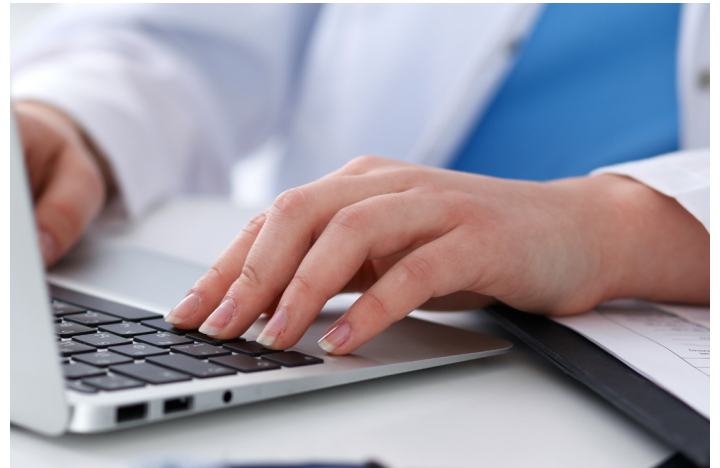

- **Active Shooter Training**  
Threat recognition and actions to be taken are discussed.
- **Proper Lifting Techniques**  
On-site training sessions with a focus on proper material lifting techniques to reduce the frequency and severity of back injuries.
- **Workplace Safety Training**  
Training by our OSHA Outreach Authorized Trainers focuses on identifying unsafe acts vs. unsafe conditions, life safety requirements and hazard mitigation in a healthcare setting.
- **Defensive Driving**  
On-site training for standard safe practices for motor vehicle operators in a healthcare setting. Done in conjunction with our S:ERVE Distracted Driving module.
- **Management of Aggressive Behavior (MOAB) Instructor Course**  
Our continued partnership with MOAB Training International, Inc. allows us to host a three-day instructor-training course each year. The course covers methods of handling aggressive behavior.
- **Educational Fairs**  
Participation in your organization's skill fairs and educational weeks.

## Risk Reduction Tools

- **Online Toolkit Resources**  
Comprehensive online library of expert-assembled tips, tutorials, and best practices to help support your employee safety program and other risk management initiatives.
- **Claims Review and Trend Analysis**  
In-person review of the frequency and severity of claims reported for each year and identification of trends in injury type as well as departments where the claims occurred. Targeted loss specification plans of action, including employee training, are recommended based upon findings of the claim review data.
- **Return to Work Program Development**  
Assistance in developing and maintaining a robust transitional duty policy and program.
