

CHER On-site Training

Designed for team engagement, hands-on learning, and convenience, our on-site training courses bring the experts directly to you. Browse our complete list of offerings below to find topics that best fit your employee needs.

Back Injury Prevention for Material Handling

Our training includes a discussion about safe lifting techniques and how to safely lift materials to prevent back injuries. The content discussed is appropriate for all employees who may need to lift any materials.

Bullying and Harassment

Suitable for all staff members, our bullying and harassment training helps address provocation, intimidation, and violence in the workplace. The presentation discusses what constitutes bullying and harassment, why it happens, the implications of bullying and harassment in the workplace, and what can be done when it occurs.

Dietary Safety

Our dietary safety video presentation addresses the unique hazards faced by dietary staff and provides safety tips to prevent accidental injury. The content discussed in this training is ultimately beneficial in providing dietary staff members with the awareness and insights they need to stay safe while they work.

Environmental Services Safety (EVS)

Designed to highlight the hazards faced by EVS staff, this training emphasizes unique risks present while preparing staff members with lessons in slip/trip/fall prevention, chemical safety, use of fire extinguishers, and sharp object safety. EVS staff members will gain the insights and information they need to stay safe while at work.

Globally Harmonized System (GHS) Labeling Requirements

By streamlining the handling of chemicals, our GHS Labeling Requirements presentation is designed to enhance chemical safety – and thereby overall work safety – in your organization. The content provided focuses on the requirements and interpretation of the GHS labeling system, including a pictogram challenge game and learning exercise.

Globally Harmonized System (GHS) Safety Data Sheet

The GHS Safety Data Sheet presentation helps improve the awareness of chemical properties and information that your employees may come into contact with daily. The discussion and content provided focus on understanding GHS safety data sheets and include an interactive learning exercise.

Ladder Safety

This presentation is designed to increase your staff's understanding of ladders and the risks they pose in the workplace. Ladders of all types are discussed in this module, from small step ladders to tall ladders used mostly by maintenance workers. The goal of this lesson is to raise employee awareness of safety measures that should be taken to prevent injury when using ladders.

Safety and Security in Home Healthcare

Heighten the awareness of safety and security for all home healthcare professionals in your organization with insights and training that directly apply to the home environment. The training includes a discussion of the unique issues that home healthcare presents to professionals as well as strategies to mitigate those risks to create a culture of safety.

CHER On-site Training Offerings Continued

Situational Awareness

Discover how heightened awareness of your surroundings can improve safety and reduce the risks of injuries and violence in our exclusive situational awareness training presentation. This lesson is valuable for anyone working in a healthcare facility to improve the overall culture of safety.

Slip, Trip, Fall Prevention

Explore the common slip/trip/fall hazards present in healthcare facilities and learn insights to protect yourself, your team, and visitors to your facility with our Slip, Trip, Fall Prevention presentation. The content of this lesson raises awareness of these hazards in the workplace through the use of pictorial examples and discussion, and its insights apply to all staff members.

Workplace Safety

Our general Workplace Safety overview presentation encompasses many common hazards in the healthcare workplace, including discussions on workplace violence, material handling, slip/trip/falls, distracted driving, and sharps handling. This content applies to all staff members as it provides a high-level discussion of mitigation strategies.

Workplace Violence Prevention

Our workplace violence prevention presentation satisfies the annual training required of all employees by using detailed lessons and mitigation strategies. Within the lesson, we discuss how to recognize the potential for violence, when and how to seek assistance to prevent or respond to violence, how to report violent incidents to law enforcement, and what resources are available to help employees cope with workplace violence incidents.

Active Shooter Education

Designed to empower healthcare professionals, our active shooter education training provides your team with critical guidance on personally surviving and protecting others inside an active shooter situation. Distinct from many workplace settings, the healthcare community has a unique requirement to promote a “safe and secure environment of care” for their patients. In this lesson, we discuss how to react when a violent intruder enters the facility as well as covering the four A’s: Accept, Assess, Act, and Alert. Ultimately, this presentation illustrates how awareness, preparation, and rehearsal can prepare you to help yourself and others survive potentially fatal situations.

Reducing Your Liability Risks Through Proper Nursing Documentation

Developed specifically for nurses, this presentation stresses the importance of proper nursing documentation in the medical record. The lesson covers documentation habits and actions to avoid, and it provides helpful tips to ensure effective documentation overall.

Keeping Peace in the Workplace

Our presentation is perfect for any healthcare organization – including physician office practices – desiring to reduce workplace violence. Learn how to identify escalating behaviors and how to intervene early to defuse a potentially violent situation. We also discuss behaviors of concern and how heightened awareness and reporting of violent behavior can help reduce the incidence of these situations overall.
