

CLINICAL PHARMACIST - Antimicrobial Stewardship (Community Network)

Location: Duke Antimicrobial Stewardship Outreach Network (DASON); Georgia/South Carolina

Details: Clinical Pharmacist

Job Description **Occupational Summary**

Antimicrobial Stewardship (Community Network) Clinical Pharmacist is a resource dedicated to enhancing the quality of medication use through antimicrobial stewardship. This individual will work collaboratively with clinical pharmacists, medical staff, and other healthcare workers at participating Antibiotic Stewardship Community Network hospitals under the direction of the Medical Directors of the Duke Antimicrobial Stewardship Outreach Network (DASON, <http://dason.medicine.duke.edu/home>).

Work Performed

Promote, advise, and guide the development of successful local antimicrobial stewardship programs at participating Network hospitals. Assist local staff in program assessments, antimicrobial utilization reviews, developing program structures and interventions, and identifying opportunities to optimize antimicrobial use.

Participate in the development, education, and communication of infectious disease-related protocols to improve antibiotic decision-support for Antibiotic Stewardship Community Network clinicians relating the selection, dose, duration, and monitoring of antimicrobials.

Participate in the preparation of reports intended to document the impact of stewardship programs on quality, safety, and cost of antimicrobial use.

Perform other related duties incidental to the work described herein.

The above statements describe the general nature and level of work being performed by individuals assigned to this classification. This is not intended to be an exhaustive list of all responsibilities and duties required of personnel so classified.

Minimum Qualifications

Duke University is an Affirmative Action/Equal Opportunity Employer committed to providing employment opportunity without regard to an individual's race, color, religion, age, gender, sexual orientation, National origin, genetic information, veteran status, or disability.
.....

Education

Doctor of Pharmacy Degree

OR

BS Pharmacy Degree

Experience

Two years of clinical experience and/or completion of a PGY1 residency and PGY2 residency in infectious disease are desired. In lieu of a PGY2 residency in infectious diseases, completion of an Antimicrobial Stewardship Certification Program is also desirable.

Candidates with experience as a member and leader of Antimicrobial Stewardship Programs are preferred.
