

SCHOOL BOARD RISK SERVICES

Risk management services designed specifically to address the safety needs of schools, school nursing programs including school based health clinics and special education programs to help you identify risk, understand best practices and implement cost effective strategies to mitigate risk.

RISK ASSESSMENTS

Assessments for all types of general liability, workplace safety, and campus safety hazards. Onsite visits identify gaps in compliance with existing policies and best practices. A customized report of the visit summarizes the findings and provides practical recommendations for improvement. Visits consist of interviews with staff, observation, policy review and walk throughs of the facility. Assessments are conducted by clinical and non-clinical Risk Consultants well versed in OSHA compliance, workers compensation safety programs, clinical best practices and workplace violence prevention.

- **School-Based Health Clinics, School Nursing Programs and SPED Assessments**
- **Organizational and Campus Safety Assessments**
- **Workplace Safety Assessments**
- **Security & Threat Assessments**
